Expansion

MINI EXPANSION „PEGASUS DEPOT“

The “Pegasus Depot” tile **replaces** the “Post Office”.

During setup, place one “Mail indicator” each on the dice symbols 4, 5, and 6. The fourth Mail indicator will not be used.

ACTION

Roll two dice and check how many numbers you rolled of those covered by a Mail indicator.

There are three cases:

- **Both numbers are covered:** Do not move any Mail indicators.
- **Only one number is covered:** Move a Mail indicator such that both rolled numbers are covered, i.e. you may not move the Mail indicator covering the other number you rolled.
- **None of the numbers is covered:** Move two Mail indicators such that both rolled numbers are covered. If you rolled doubles (and that number is not covered), only move one Mail indicator on that number.

Afterward, **take the resources** printed next to the **three uncovered numbers**. If “6” is uncovered, you may choose one of the three depicted resources: coffee is only available if you are playing with the “Mocha & Baksheesh” expansion; the letter is only available if you are playing with the “Letters & Seals” expansion.

Examples based on the initial setup:

1. You roll “2” and “5”: “5” is covered already so you have to cover “2” by moving the Mail indicator from “4” or “6”. You choose to uncover “6” so “1”, “3”, and “6” are all uncovered. As a result, you receive 2 Lira, 1 yellow and 1 blue good.

2. You roll “4” and “6”: Both numbers are covered, so you do not move any Mail indicators and you receive 5 Lira and 1 yellow good.
